

The figure consists of a 5x5 grid of 25 identical charts. Each chart displays a 30-day timeline, with days numbered 1 through 30. The timeline is represented by a horizontal bar chart with blue bars. The height of the bars increases linearly from day 1 to day 30. A line graph is overlaid on the bar chart, showing a steady upward trend. The line starts at a low value on day 1 and reaches a higher value on day 30. The chart is titled '30-Day Timeline' and includes a legend indicating that the blue bars represent 'Daily Data' and the line represents 'Cumulative Data'.
